

SCRUM REPORT and MEETING AGENDA

Report #: 10 Project Name: Book Worms
Date: 4/29/2021 Prepared by: Gaurav Bhalla

Attendees for the meeting

1. Nicholas Evans
2. Paanery Shah
3. Raquel Barahona
4. Gaurav Bhalla

Agenda for the meeting

1. Talk about current tasks we have done since the last meeting, any issues and what we have to do by the end of Sprint 3.
2. Go over what we need to do for our final presentation on Wednesday May 5th at 2 p.m.

Overall accomplishments since last meeting

1. Started to test functions to insert and read from database tables and created basic login and registration forms.
2. Generated a playlist and recommended tracks.
3. Updated styling of different web pages to be uniform.
4. Updated diagnostic web page, search bar page, and playlists page.

Tasks completed by each team member since last meeting

Task description	Assigned to	Completed?
Wrote functions to register information for users and authenticate returning users logging in, and have also designed.	Gaurav	yes
Added stylization and accessibility to pages.	Nick	yes
Researched & implemented Google Translate API	Paanery	yes
Researched various methods to conduct the recommendation algorithm	Matthew	yes
Talk to the team about the various methods to conduct this recommendation	Matthew	no
Finalized recommendation algorithm	Raquel	yes

Plans for next period

1. Add styling to registration and login page.
2. Create different stylesheets for different color blind people if we have time.
3. Integrate use of the Open Library Books API to get the genre of the books to use for the application and use genre for generating playlist for user.
4. Make easier navigation throughout the entire application.

Task assignment per team member (to be completed before the next meeting)

Task description	Assigned to
Deploying the latest version of our web application on AWS with a login and registration page working on the backend.	Gaurav
Directory Page update.	Paanery
Add read book feature to index page	Nick
Work on the styling of the playlist page	Raquel
Create the recommendation code using	Matthew
Get feedback from the team about how we want to create the recommendation algorithm	Matthew
Provide feedback to the user once the request has been submitted	Paanery
Add Google Translate consistently throughout all the webpages	Paanery

Project management status

1. Update product backlog burndown chart and create burndown chart.
2. Update sprint backlog to reflect tasks that need to be completed for Sprint 3.
3. Create slides for final presentation.

Minutes from previous meeting

Need to use google translate API to translate pages into another language. Need to create different stylesheets for different color blind people. After, should, integrate use of the Open Library Books API to get the genre of the books to use for the application and use genre for generating playlist for user. Also, we need to make easier navigation throughout the entire application. Regarding project management, we should update the product backlog burndown chart and create burndown charts for the Sprint 3 backlog. Then, we also need to create slides for the final presentation and practice for the final presentation.
